A history of ultrasonography in Obstetrics and Gynecology Part 3. The advent of the real-time scanners also prompted research into body movements and breathing movements of the fetus. The study of fetal breathing movements (FBM) was first suggested by Geoffrey Dawes and K Boddy at the Nuffield Institute of Medical Research, Oxford University, England, in the early '70s, in that the presence or ...

History of Ultrasound in Obstetrics and Gynecology, Part 3

The gestational sac is the first identifiable structure routinely imaged in the first trimester. It is identified by transabdominal ultrasound as early as 5 weeks' gestation and may be seen as early as 4 weeks' gestation by transvaginal ultrasound. 15, 16, 47 The gestational sac is an echo-free space containing the fluid, embryo, and extraembryonic structures.

Assessment of Gestational Age by Ultrasound | GLOWM

Obstetric ultrasonography is the use of medical ultrasonography in pregnancy, in which sound waves are used to create real-time visual images of the developing embryo or fetus in its mother's uterus (womb). The procedure is a standard part of prenatal care in many countries, as it can provide a variety of information about the health of the mother, the timing and progress of the pregnancy, and ...

Obstetric ultrasonography - Wikipedia

A history of ultrasonography in Obstetrics and Gynecology Part 2. Real-time, the real revolution. The innovation which had soon completely changed the practice of ultrasound scanning was the advent of the Real-time scanners. The first real-time scanner, better known as fast B-scanners at that time, was developed by Walter Krause and Richard Soldner (with J Paetzold and Otto Kresse) and ...

History of Ultrasound in Obstetrics and Gynecology, Part 2

Fetal Development: the First Trimester 3 Weeks. The two sets of cell nuclei containing DNA from you and your partner fuse together inside the egg after the sperm penetrates the egg. The fusion assigns your baby, now called a zygote, a gender, eye and hair color and more than 200 other genetically determined characteristics.

Fetal Development Week by Week: Stages of Baby Growth

The gestational sac implants and is surrounded by a decidual reaction. The echogenic line of the uterine cavity bypasses the gestational sac - "Intradecidual sign". This differentiates a low lying pregnancy or cervical ectopic pregnancy from an abortion in progress.

The Normal Gestational Sac - fetal ultrasound

Research Article - Biomedical Research (2017) Volume 28, Issue 7. Diagnosis of abnormal pregnancy and outcomes by color Doppler ultrasound Qiyuan Wang *, Yan Zhou, Hui Xu and Guilian Qin. Ultrasound Department, Maternity and Child Care Center of Qinhuangdao, Qinhuangdao City, Hebei Province, China
